Docket No. 04-AFC-01

SFERP STATUS REPORT #5

The Committee Interim Scheduling Order issued on May 19, 2005 requested that the parties file status reports to inform the Committee of the progress of the case, as well as the emergence of any matters which may delay (or accelerate) issuance of significant documents such as the PSA. This Status Report by the City and County of San Francisco ("City" or "Applicant") for the San Francisco Electric Reliability Project ("SFERP") addresses the status of the licensing proceedings since the City filed its last status report on June 10, 2005.

On March 29, 2005, the City filed a revised application with the Bay Area Air Quality Management District (BAAQMD) addressing the new location for the SFERP. The City is cooperating with the BAAQMD to support an expeditious review of the application and issuance of a PDOC. The City has been in regular communication with BAAQMD to ascertain the status of the PDOC. The City has been informed that the agency expects to issue the PDOC within the next week.

During the past month, the City has continued to respond to data requests. It intends to submit responses to informal staff requests today and to submit, on July 25, responses to those requests of intervenor Mr. Sarvey to which it did not object.

In addition, on June 20 and 21, the City held open houses in the affected Southeast San Francisco communities to provide information and to afford the public a further opportunity to comment on the project generally and on the mitigation measures under consideration in particular. The City is refining the components of its PM10 mitigation and community benefits proposal and intends to file its proposal no later than the end of this month.

Applicant will continue to work diligently with CEC Staff, Intervenors, and the BAAQMD to move this case forward in as expeditious a manner as possible.

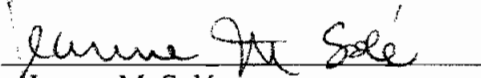

Dated: July 11, 2005

Respectfully submitted:
